
MOAT Labs

Command Center Architecture

How every automation, agent, and system works together.

For the MOAT Labs team | March 2026

14 Agents	7 Layers	\$97/mo	1 Dashboard
Make.com scenarios	Functional areas	Total tool cost	moat-labs-dashboard.vercel.app

System Map

The Command Center connects 4 platforms. Every arrow is automated -- no manual data entry.

Platform	Role	Cost
Google Sheets	Database: Pipeline, Outbound, Contabilidad, Prospecting, Analytics	Free
Make.com	14 automated scenarios (webhooks, RSS, schedules)	\$29/mo
OpenAI (GPT-4o-mini)	AI brain: emails, intel briefs, prospecting, reports	\$5-10/mo
Vercel	Dashboard hosting + Vercel password protection	Free
Gmail	Email delivery for outbound + newsletters + briefs	Free
Google Analytics 4	Website traffic tracking (moatlabs-ventures.com)	Free
Google Drive	Image storage for content posts	Free

Layer 1: Outbound Sales Engine

AI-powered cold outreach with quality gates, 3-touch sequences, and domain safety. Handles the entire lifecycle from lead insert to response detection.

Outbound Generate	Webhook (dashboard "Generate" button)
Purpose	AI writes a personalized cold email using segment-specific playbooks (VCs LATAM, Founders LATAM, etc.). Includes discovery link and website in signature. Returns [SUBJECT] and [BODY].
Modules	Webhook -> OpenAI (GPT-4o-mini) -> WebhookRespond

Quality Review Agent	Webhook (auto-triggered after Generate)
Purpose	Scores every email 0-100 on spam risk, personalization, tone, and ICP fit. If score < 70, the Send button is blocked in the dashboard with "Revise first".
Modules	Webhook -> OpenAI -> WebhookRespond

Outbound Send	Webhook (dashboard "Send" button)
Purpose	Sends the approved email via Gmail. Updates Status column, sets SeqStep=1 and LastSent=today.
Modules	Webhook -> Gmail send -> Google Sheets update

Auto Follow-up Generator	Daily 8:00 AM COT
Purpose	3-touch sequence: reads SeqStep + LastSent for every auto lead. SeqStep=1 + 3 days elapsed = generate Follow-up. SeqStep=2 + 5 days = generate Break-up. Writes to Subject/Message columns but does NOT send (human reviews first).
Modules	Sheets read -> OpenAI -> Sheets update
Schedule	Daily 8:00 AM COT

Gmail Response Scanner	Daily 9:00 AM COT
Purpose	Scans inbox for replies to outbound leads. Cross-references sender email with Outbound sheet. Updates status to "respondio" when a reply is detected.
Modules	Gmail search -> Sheets cross-reference -> Sheets update
Schedule	Daily 9:00 AM COT

Bulk Insert	Webhook
Purpose	Inserts new leads into the Outbound sheet tab. Used by Prospecting "Add to Outbound" button and bulk import workflows.
Modules	Webhook -> Google Sheets addRow

Layer 2: Lead Discovery (Prospecting)

Weekly automated lead discovery from news. Strict ICP filtering ensures only relevant small/mid-size LATAM companies appear.

Auto Prospecting Weekly	Weekly (Monday)
Purpose	Scans 2 RSS feeds (Spanish + English) for news about startups and SMBs in LATAM. OpenAI extracts leads matching strict ICP: 10-50 employees, commoditized industries (marketing agencies, insurance, recruiting, IT services, etc.), \$100K-\$5M revenue. Explicitly rejects Fortune 500, Big 4, and global tech companies. Writes structured [LEAD] blocks to Prospecting sheet tab.
Modules	RSS (ES) -> Aggregator -> RSS (EN) -> Aggregator -> OpenAI -> Sheets
Schedule	Weekly, Monday

ICP Filter (Dashboard-side): Even if OpenAI slips, the dashboard has a blocklist of 35+ non-ICP companies (Salesforce, Deloitte, etc.) that are filtered before display. Leads are deduplicated by company name (highest score wins) and paginated 5 at a time.

User Actions: Each lead card has "Add to Outbound" (sends to Bulk Insert webhook) and "Dismiss" (saved to localStorage, never shown again).

Layer 3: Competitive Intelligence

On-demand AI analysis for active deals in the pipeline.

Intel Brief	Webhook (dashboard "Intel" button)
Purpose	Generates a strategic intelligence brief for any company in the pipeline. Searches Google News RSS for recent articles, then OpenAI produces: Company Snapshot, Recent Signals, Pain Points, and Conversation Starters. Has error handling (Resume) so it works even when RSS returns no results.
Modules	Webhook -> RSS (with error handler) -> Aggregator -> OpenAI -> WebhookRespond
Schedule	On-demand (instant)

Layer 4: Pipeline Management

Connects outbound nurturing to the sales pipeline.

Lead to Pipeline	Webhook (dashboard modal)
Purpose	When a lead advances to "reunion" status, the dashboard shows a deal creation modal. On confirm, creates a new row in the Pipeline sheet with company, contact, deal value, stage, and date. Bridges outbound automation with pipeline tracking.
Modules	Webhook -> Google Sheets addRow (Pipeline tab) -> WebhookRespond

Layer 5: CEO Intelligence Layer

Daily and weekly automated reports so the CEO starts every day informed.

CEO Morning Brief	Daily 7:00 AM COT
Purpose	Reads Pipeline, Outbound, and Contabilidad sheets via Google Sheets API. OpenAI generates a scannable daily brief: revenue tracker, action items, pipeline health, outbound pulse, and priority #1. Minimal HTML, designed for phone.
Modules	Sheets API (3x) -> JSON Transform (3x) -> OpenAI -> Gmail
Schedule	Daily 7:00 AM COT

Weekly Performance Report	Weekly Monday 7:00 AM COT
Purpose	Comprehensive weekly report: revenue vs \$100K target, pipeline summary, outbound stats (sent, response rate, meeting rate), and top 3 actionable recommendations.
Modules	Sheets read -> OpenAI -> Gmail
Schedule	Weekly, Monday 7:00 AM COT

Layer 6: Content & Web Analytics

Tracks website performance and supports content management.

GA4 Weekly Sync	Weekly Sunday 7:00 AM UTC
Purpose	Pulls traffic data from Google Analytics 4 (property 510766684) via Data API. Two reports: traffic sources and top pages. Writes JSON to Analytics sheet tab. Dashboard parses and displays as charts.
Modules	GA4 Data API (2x runReport) -> JSON Transform (2x) -> Sheets addRow
Schedule	Weekly, Sunday

Image Upload	Webhook
Purpose	Uploads images to Google Drive for content posts. Returns public URL.
Modules	Webhook -> Google Drive upload -> WebhookRespond

Image Cleanup	Daily
Purpose	Deletes moat-img-* files older than 5 days from Google Drive to manage storage.
Modules	Google Drive list -> filter -> delete
Schedule	Daily

Layer 7: Dashboard (Frontend)

Static HTML/CSS/JS app deployed on Vercel. No build tools. Google Sheets as read-only backend via GViz API.

Tab	Sections	Data Sources
Ventas	KPIs (leads, revenue, win rate) + Pipeline Funnel + Intel Briefs + Outbound Metrics (Contact Stage, Outbound Prospects)	Pipeline, Ventas (Contact Stage, Outbound Prospects) + P
Finanzas	Contabilidad (client payments, pending, expenses, balance) + Cashflow (waterfall: cobrado -> IVA -> Catalina -> taxes)	Contabilidad, Ca
Contenido	Web Analytics (GA4 charts) + Content Calendar + LinkedIn Performance	Contenido, Shred, Analytics
Operaciones	Sales Velocity metrics + Performance Charts	Pipeline, Gastos, Contenido, Metricas

- Quick Actions Bar:** Fixed bottom bar with live counts -- Review Queue, Responses, Pipeline Value.
- Lead Scoring:** Calculated client-side. 85+ Hot (green), 70-84 Warm (orange), <70 Cold (gray).
- Segment Playbooks:** 6 playbooks auto-detected by source/industry/country. Each shapes the AI email.
- Domain Safety:** 15 emails/day max. Volume tracked in localStorage. Quality gate blocks sends < 70.
- Outbound-to-Pipeline Bridge:** Deal creation modal when advancing leads to "reunion".
- Lazy Loading:** Each tab only fetches the Google Sheets tabs it needs. Cache shared across tabs.

Complete Data Flow

How data moves through the system, from lead discovery to deal close.

Stage	What Happens	Agents Involved
1. Discovery	RSS scans news weekly. OpenAI extracts ICP-matching leads. Writer Pro suggests weekly.	Writer Pro, Prospecting Weekly
2. Qualification	CEO reviews leads in dashboard. Clicks "Add to Outbound" or "Dismiss" (webhook)	Bullish
3. Outreach	AI generates personalized email using segment playbook. Quality Gate scores lead. CEO + Quality Reviewers Send	Gate Score, CEO, Quality Reviewers, Outbound Send
4. Follow-up	Auto Follow-up checks timing daily. Generates Touch 2 (day 3) and Auto Follow-up (day 8). Human reviews before sending.	Auto Follow-up, Bullish
5. Response	Gmail scanner detects replies. Updates lead status to "responded". Daily Response Scanner response context panel.	Daily Response Scanner
6. Meeting	Lead advanced to "reunion". Deal creation modal fires. New Pipeline created automatically.	Lead to Pipeline
7. Close	Deal progresses through Pipeline (Lead -> Meeting -> Closing -> Deal). Deal is tracked in Contabilidad.	Deal, Deal Human
8. Reporting	CEO Morning Brief (daily), Weekly Performance Report (Monday), CEO Brief + Weekly Report + GA4 Sync	CEO Brief, Weekly Report, GA4 Sync

Monthly Cost Breakdown

Total operational cost to run the full Command Center.

Service	Plan	Monthly Cost	What It Does
Make.com	Core (10K ops)	\$29.00	14 scenarios, webhooks, scheduling
OpenAI API	Pay-as-you-go	\$5-10	GPT-4o-mini for all AI tasks
Vercel	Hobby (free)	\$0	Dashboard hosting + password
Google Sheets	Free	\$0	Database (7 tabs)
Gmail	Free	\$0	Email delivery
Google Analytics 4	Free	\$0	Website traffic tracking
Google Drive	Free	\$0	Image storage
Instantly	Growth	\$47.00	Cold outreach (separate domain)
TOTAL		\$81-97/mo	

vs. SaaS Alternatives:

Capability	SaaS Alternative	SaaS Cost	MOAT Cost
CRM + Pipeline	HubSpot Sales Pro	\$450/mo	\$0 (Sheets)
Email Sequences	Apollo.io	\$99/mo	\$29 (Make)
AI Email Writing	Lavender.ai	\$49/mo	\$5 (OpenAI API)
Competitive Intel	Crayon.co	\$500/mo	\$0 (included)
Prospecting	ZoomInfo	\$250/mo	\$0 (included)
Analytics Dashboard	Databox	\$79/mo	\$0 (Vercel)
	TOTAL	\$1,427/mo	\$81-97/mo

Quick Reference: All 14 Agents

Complete list of every Make.com scenario with IDs, triggers, and schedules.

ID	Name	Trigger	Schedule
4482536	Auto Prospecting Weekly	Scheduled	Monday
4481670	Outbound Generate	Webhook	On-demand
4486756	Quality Review Agent	Webhook	On-demand
4481672	Outbound Send	Webhook	On-demand
4486869	Auto Follow-up Generator	Scheduled	Daily 8AM COT
4486974	Gmail Response Scanner	Scheduled	Daily 9AM COT
4482358	Bulk Insert	Webhook	On-demand
4481549	Intel Brief	Webhook (instant)	On-demand
4487489	Lead to Pipeline	Webhook	On-demand
4487522	CEO Morning Brief	Scheduled	Daily 7AM COT
4487158	Weekly Performance Report	Scheduled	Monday 7AM COT
4485921	GA4 Weekly Sync	Scheduled	Sunday 7AM UTC
4481443	Image Upload	Webhook	On-demand
4481444	Image Cleanup	Scheduled	Daily
